THE LOSS THAT MADE ME
When I was in my BTech 2nd year, I got selected for a hackathon, and the prize? an internship with a PPO of 19 LPA.
Sounds cool, rightâ€¦ almost unreal.
And after hackathon waited for months and results were out and I saw I made it ..
So what next, i have security in my pocket so it was time to enjoy and as a movie lover, I slipped into movies and web series, Long nights weren't for debugging anymore;
they were for web series and random plans with friends. I was chilling, celebrating, and already spending that 19 LPA in my head.
Sounds like a movie script, right? The perfect success story.
I like thriller and suspense genres in movies always look for twists so the twist here is
The truth is, fortunatelyâ€"or unfortunately I never actually got that internship. Despite the effort, despite the hype, and despite already living like a 'winner'... my name
wasn't on the final list.
I donâ€™t know how a breakup looks like, but at that time, it felt exactly like oneâ€¦
Some of my friends got selected, and I didnâ€™t.
I started seeing myself as a LOSER.
Like a breakup person, I spent nights staring at the ceiling, unable to sleepâ€¦ scolding myself, replaying everything, asking what I did wrong.
And repeatedly thinking about what others think of meâ€¦ are they gonna judge me? Am in useless? I am not worthy?
But at that time, I didnâ€™t know it happened for meâ€¦
Because back then, I knew only little development and just the basics of DSA.
Then I started giving coding contests.
I became a 4-star coder on Code Chef and achieved a Knight badge on LeetCode.
I participated in hackathons and coding contestsâ€¦ again and again.
What if I had got selected back thenâ€¦
Would I have become betterâ€¦ or just comfortable?
The movie was not yet done.
I came to the 4th year, campus placements.
I went to the final round for 3â€"4 companies, but the result was the sameâ€¦ unfortunately, not selected.
And again, I was left with sadness, different copies of resumes, and silence.
But this time, something was different.
From every interview, I learned something newâ€¦
I didnâ€™t clear them, but I walked out knowing more than when I walked in.
I started understanding where I was strong and where I needed to improve.
The fear slowly reduced.
The confidence slowly increased.
